

Web Developer – Angular/JavaScript/Java (m/f)

We need you to help bring a zero-waste future to life by mastering technology.

Resourcify GmbH is a technology company providing a cloud platform for digital waste management, with a focus on simplicity, neutrality and sustainability. The company was founded in Hamburg in 2015 to help businesses easily manage their recycling, and recyclers to seamlessly connect with their customers online. Resourcify aspires to help the world transition to a sustainable and circular economy, with the digitisation of recycling.

We are looking for someone who shares our passion and can help support us on the tech side.

What to expect

- Join our growing development team in a startup atmosphere
- Take over responsibility for developing, testing, and deploying new features
- Develop iOS, Android, and web apps
- Shape our product in our growth phase and do good for the environment
- Share your knowledge and learn together.
- Work in a great office at Mindspace Hamburg (you'll love it) or remotely
- 30,000€ - 50,000€ with option for shares depending on your experience

What you need to bring

- Passion in software engineering
- Analytical skills
- But you also get shit done
- Learning attitude
- Degree in computer science or similar
- Fluent in English and optionally German
- Sense of humor

We expect experience in

- JavaScript and AngularJS
- Java or similar
- App development (optional)
- Test-driven development (TDD)
- Agile Teams
- Version Control (Git)

Interested?

Let's talk! Please send an email to jobs@resourcify.de with your CV, availability, and ideally some code (e. g. GitHub profile).

Apply today, start tomorrow.
